

Books for Families in Need

Lifetrack Resources' home visitors have an on-going need for books for families who don't have any or enough books for their children.

Reading to babies is critical in **early brain development** and plays an important role in **parent-child attachment** as well as developing **school readiness skills**.

**Donations needed for:
New (or gently used) books
for children ages birth-five.**

Board books are our greatest need.
